

**THURSDAY \* NOVEMBER 3  
I AM THANKFUL FOR SPACE**

There is always a space between everything in life. There is a space between words and a space between sounds. There is a space between cells and space between atoms. No matter how big or small there is always a space.

Sometimes the space is so small we can't even see it but there is always a space. That space is God.

Today be silent long enough that you can hear the space between sounds. Look for the space between objects. Sense the space between everything and experience the presence of God.

I am thankful that there is always a space for God in my life.
